

OLIVIA GIANDREA

Los Angeles, CA • olivia.giandrea@gmail.com • <https://oliviagiandrea.github.io/portfolio-site/>

Software Engineer with 3 years of experience building high-performance React applications, scalable design systems, and engineering tooling that accelerates development, improves accessibility, and enables consistent product delivery.

SKILLS

- **Languages:** JavaScript, TypeScript, Python, HTML, CSS, SASS
- **Frameworks & Libraries:** React, Next.js, Node.js, Express, Bootstrap, Tailwind CSS, jQuery
- **Platforms & Developer Tools:** Git, GitHub, GitHub Actions, Dependabot, Docker, Amazon Web Services (AWS), Webpack, Jest, WebdriverIO, Figma, Storybook, Unix
- **Data & Web Technologies:** REST APIs, GraphQL, MySQL, MongoDB, Accessibility (WCAG), Static Site Generation
- **Engineering Practices:** Agile Development, Design Systems, Component Design, API Design, Data Modeling, Content Modeling, User Experience (UX), Leadership, Organization, Teamwork, Written Communication

PROFESSIONAL EXPERIENCE

Software Engineer II | SurveyMonkey

Feb 2025 - Present

Software Engineer I | SurveyMonkey

Jun 2023 - Feb 2025

- Owned and scaled the company design system on the Web Experience team using React, CSS Modules, and GitHub Actions, enabling consistent UI development across 23 product teams.
- Improved design system infrastructure by closing 71 styles-related bugs, increasing org-wide adoption by 32%.
- Updated out-of-date dependencies with Dependabot and Github Actions, merging 487 update PRs and fixing 162 security vulnerabilities across 8 repositories.
- Built and drove org-wide adoption of reusable GitHub Actions, standardizing build, test, lint, and publish workflows and reducing average CI runtime from 9m 29s to 2m 57s.
- Led company-wide migration from the deprecated JSS styling framework to CSS Modules, converting 64 shared components and rewriting infrastructure across 3 repositories, reducing average page load time by 13%.
- Drove accessibility (A11y) initiatives by creating 3 workshops, 1 WorkRamp course, and shipping 21 design system accessibility improvements, directly mitigating 2 pending legal accessibility risks.
- Redesigned the frontend interview process, developing a new curriculum and conducting intern interviews to improve hiring consistency and candidate evaluation.
- Aligned frontend engineering practices across teams through Slack discussions, guild leadership, and working groups, reducing duplicated effort and accelerating cross-team delivery.

CS Department Teaching Assistant | Wellesley College

Sep 2021 - May 2023

- Awarded Excellence in Teaching Award in Computer Science as a TA who “went out of their way to create and sustain a warm and welcoming environment conducive to learning.”
- Collaborated with faculty to modernize CS304 (Databases with Web Interfaces) by redesigning the curriculum around the MERN stack (MongoDB, Express, React, Node.js); served as TA for the revised course.
- Instructed and supported 1-50 students per session in Python, data structures, frontend development, full-stack web applications, and database administration through labs, lectures, and office hours.

Software Engineer Intern | SurveyMonkey

Jun 2022 - Aug 2022

- Developed and maintained user-facing web content using React, HTML, and CSS on the Content Engineering team.
- Edited and enhanced Storybook stories for 7 UI components, reducing frontend debugging time by ~30% and improving developer onboarding and cross-team alignment by resolving visual regressions and typed prop errors.
- Drove a 400% increase in Sales Qualified Leads by designing and executing A/B experiments on site content variations in partnership with product and marketing teams.

Software Systems Developer Intern | Enercon Technologies

Dec 2020 - Jun 2022

- Redesigned and developed an internal company intranet using HTML, CSS, jQuery, C#, and SQL, reducing end-to-end production workflows from ~15 minutes to ~4 minutes.
- Automated manufacturing software validation, cutting manual effort from ~5 weeks to under 23 minutes through scripting and tooling improvements.
- Modernized internal tooling by migrating 5 legacy VB6 applications and integrating 13 new C# applications into the intranet, reducing employee data interaction tasks from ~6 minutes to ~2 minutes.

EDUCATION

WELLESLEY COLLEGE

Wellesley, MA

- B.A. in Computer Science; Minor in Japanese Language and Literature (**GPA: 3.89**)
- Courses from Wellesley College, MIT, and Dartmouth College.
 - Awarded the **Excellence in Software Innovation Award** out of 67 entries in MIT 6.1040 (Software Studio)

Aug 2020 - May 2023
